

Solution: Belgian statistical reporting

local knowledge global solutions

This datasheet describes the FRSGlobal RegPro solution for the ECB regulation (EC) No 25/2009 - relating to statistical reporting which takes effect in June 2010

What regulations?

The National Bank of Belgium, through related circulars has recently introduced new regulatory changes in line with the ECB regulation:

- Regulation (EC) No 25/2009 of the ECB of 19 December 2008 concerning the balance sheet of the monetary financial institutions sector (recast ECB/2008/32).

In light of the above-mentioned changes the reports have been brought in line with best international standards; better aligned with euro-area statistical requirements.

New requirements before June 2010

The introduction of new templates and formats signify major changes.

The new regulatory requirements are significant and the deadline go-live date of June 2010 is challenging. The following topics are covered:

- **Scheme A :**
 - Updates to EXISTING reporting schemes
 - 01.11: Treasury and interbank assets
 - 01.21: Interbank liabilities
 - 02.11: Credits originally granted by the reporting credit institution/breakdown according to beneficiary of credit
 - 02.12: Credit sales to third parties: breakdown according to beneficiary of credit
 - 02.22: Deposits and other creditors: breakdown according to creditors' sectors
 - 03.41: Transferable securities, stocks and other negotiable instruments: breakdown according to issuer's sectors
 - 03.51: Debts evidenced by a security: breakdown according to initial period

Introduction of NEW reports

- 02.13: Credits originally granted by the reporting credit institution: breakdown by original and remaining duration

- **MIR (Interest rate reporting for Monetary Financial Institutions)**

Updates to EXISTING reporting schemes

- 02.70: Outstanding amounts, namely contracts that are current during the reference period
- 02.80: New business, namely concluded contract that are new during the reference period

- **XML online reporting through a web-based interface**

The reporting schemes will need to be transmitted to the regulator via the National Bank of Belgium's Online Reporting System.

The FRSGlobal RegPro solution for new statistical reporting

A proven solution to automate the production of ALL regulatory reports now and in the future - ready to install and implement, test and go-live in time to meet the June 2010 regulatory requirements.

FRSGlobal RegPro for regulatory reporting

FRSGlobal RegPro solutions enable financial institutions to address major regulatory and compliance requirements locally and globally such as:

- Global compliance rules (e.g. Basel II, SOX, MiFID)
- Statutory (e.g. IFRS)
- Statistical (e.g. National Bank of Belgium)
- Prudential (e.g. Basel II)
- Transactional (e.g. MiFID)

FRSGlobal RegPro solutions comprise a combination of the following modules:

- **ReportGenerator:** generating reports from the ReportGlobal module and/or those defined by the user using ReportBuilder
- **ReportBuilder (optional):** for non-technical users to build their own reports for internal or external consumption
- **ReportGlobal (with options):** fully defined regulatory reports for a selection of more than 40 countries, including Luxembourg

Using FRSGlobal RegPro for regulatory reporting, your institution gains the following benefits:

- Coverage for regulatory reporting for over 40 countries, using one common approach
- Timely, accurate and compliant financial reports
- Easy and fast adaption to new regulatory requirements, new products, new countries and new head-office demands
- Automation of the end-to-end workflow of regulatory reporting – from collection of the data to validation to report delivery – resulting in huge reductions in time, effort, errors and expense
- Automation frees up time for meaningful data analysis

RegPro ReportGenerator module

RegPro **ReportGenerator** automates the process of generating regulatory reports, while giving the option to view and modify them as required. The ReportGenerator is the 'engine' of the RegPro suite.

- **Data management:** FRSGlobal **DataFoundation** (integral to every FRSGlobal solution) stores and manages the required data. The rules for all of the regulators are set up such that the required reports are automatically populated with the correct data
- **Data validation:** All information used in reports is automatically validated for accuracy and completeness
- **Formatting:** RegPro automates formatting to each regulator's requirements
- **Final-submission checks:** Sometimes regulators demand that specific checks be done before submission. RegPro takes care of these checks for you
- **Analysis:** With RegPro you have a huge range of options for data analysis, including:
 - **Drilling down** from a number on a report to the underlying data, seeing the rules that were applied.
 - **Drilling up** from an individual data item to see where it is used in different reports.
 - **Perform variance analyses**, comparing any period of reports and data, and setting variance thresholds (*regulators pay particular attention to discrepancies, requiring "one version of the truth"*).
- Viewing data that cannot be allocated to any of the reports; RegPro has orphan detection to give you automatic alerts to such problems.
- **Manual adjustments:** The nature of regulatory reporting means that one may need to adjust or add to the final reporting figures. This can be achieved – with tight control and all modifications fully audited.
- **Delivery:** The final step in the reporting process is submitting the reporting data to the regulator. RegPro supports any format required by regulators, including XML, XBRL, XLS and flat file, and even printed reports for those regulators who still demand them.

RegPro ReportBuilder module (optional)

RegPro **ReportBuilder** is an optional module. It enables non-technical users to define reports that are not provided by FRSGlobal (e.g. new country reports and/or internal, MIS-style reports). This is covered in more detail on a separate data sheet.

With ReportBuilder, you can go beyond the standard regulatory reports to create custom reports for a wide range of purposes, including statutory, management, head-office and profitability reporting. **The benefits include:**

- The ability to build reports based on functional knowledge – no coding required
- Ensure that your own reports are in line with regulatory reports, and that the numbers are consistent
- Exploit all the functions of RegPro
- Streamline your processes by having one integrated environment for both internal and external reporting

ReportGlobal module (with options)

RegPro **ReportGlobal** encompasses regulatory reports for 40+ countries. Firms using RegPro subscribe to use reports from one or more countries – and these are updated in accordance with local regulators' requirements under the FRSGlobal Guarantee.

- Reduces demand on Legal to keep up-to-date with regulators' requirements
- Ensure compliance by having most up-to-date reports and submissions
- Single solution across a multi-country operation: easier to maintain and enables cross-reporting
- Single DataFoundation across countries for additional analysis and reporting

FRSGlobal RegPro provides a powerful solution offering immense scope for creating reports and analysing financial performance. It is the choice of 41 of the "Top 50" global financial institutions

Summary features and benefits

- Multi-lingual, multi-currency support
- Drill-up and drill-down between data and report level
- Extensive variance analysis
- Orphan detection
- Ability to make adjustments
- Fully audited environment
- Detailed security mechanism
- One solution for global regulatory reporting
- Automated end-to-end production of regulatory reports
- Timely and accurate regulatory reporting
- The ability to keep up with changing local requirements while maintaining global consistency
- Increased management control
- Cost-effective operations
- Consolidated financial reporting and analysis

For existing FRSGlobal users: those organisations moving forward with the subscription-based service, which is implemented as part of this new reporting regime, will benefit from the FRSGlobal Guarantee: *"to keep regulatory reports up-to-date with regulator's requirements"*.

FRSGlobal Regulatory Support Update Guarantee

Centre of Risk & Regulatory Excellence

The COR²E team is responsible for maintaining the reports for each of the 40+ countries that are covered by the FRSGlobal Guarantee; keeping the reports up-to-date on behalf of our clients, and in turn keeping the client compliant with the local regulator.

Visit the COR²E section of the [website](#) to read about the regulatory demands in the 40+ countries supported by FRSGlobal.

Risk and regulatory compliance on a unified platform

Our solutions consist of a software framework of data models and report definitions together with rich automated content. Our solutions enable firms to gain a valuable insight into the risks in their operating model (balance sheet), how this may influence profitability and finally to publish this data in order to meet both regulatory and internal reporting obligations.

FRSGlobal is the only supplier of risk management and regulatory reporting, on a unified platform, with coverage for over 40 countries, servicing over 1500 financial organisations – including 41 of the top 50 banking institutions – with enterprise risk and regulatory compliance reporting solutions that enable them to increase operational efficiency, reduce costs and mitigate risks

FRSGlobal is the **ONLY** supplier of risk management and regulatory reporting on a unified platform.

FRSGlobal is the **ONLY** provider of regulatory reports for 40+ countries with a Guarantee to keep the reports up to date with regulators' requirements.

The FRSGlobal Centre of Risk & Regulatory Excellence monitors the changes that affect reporting requirements in more than 100 countries.
